and service needs.*

## Repowering with Reman

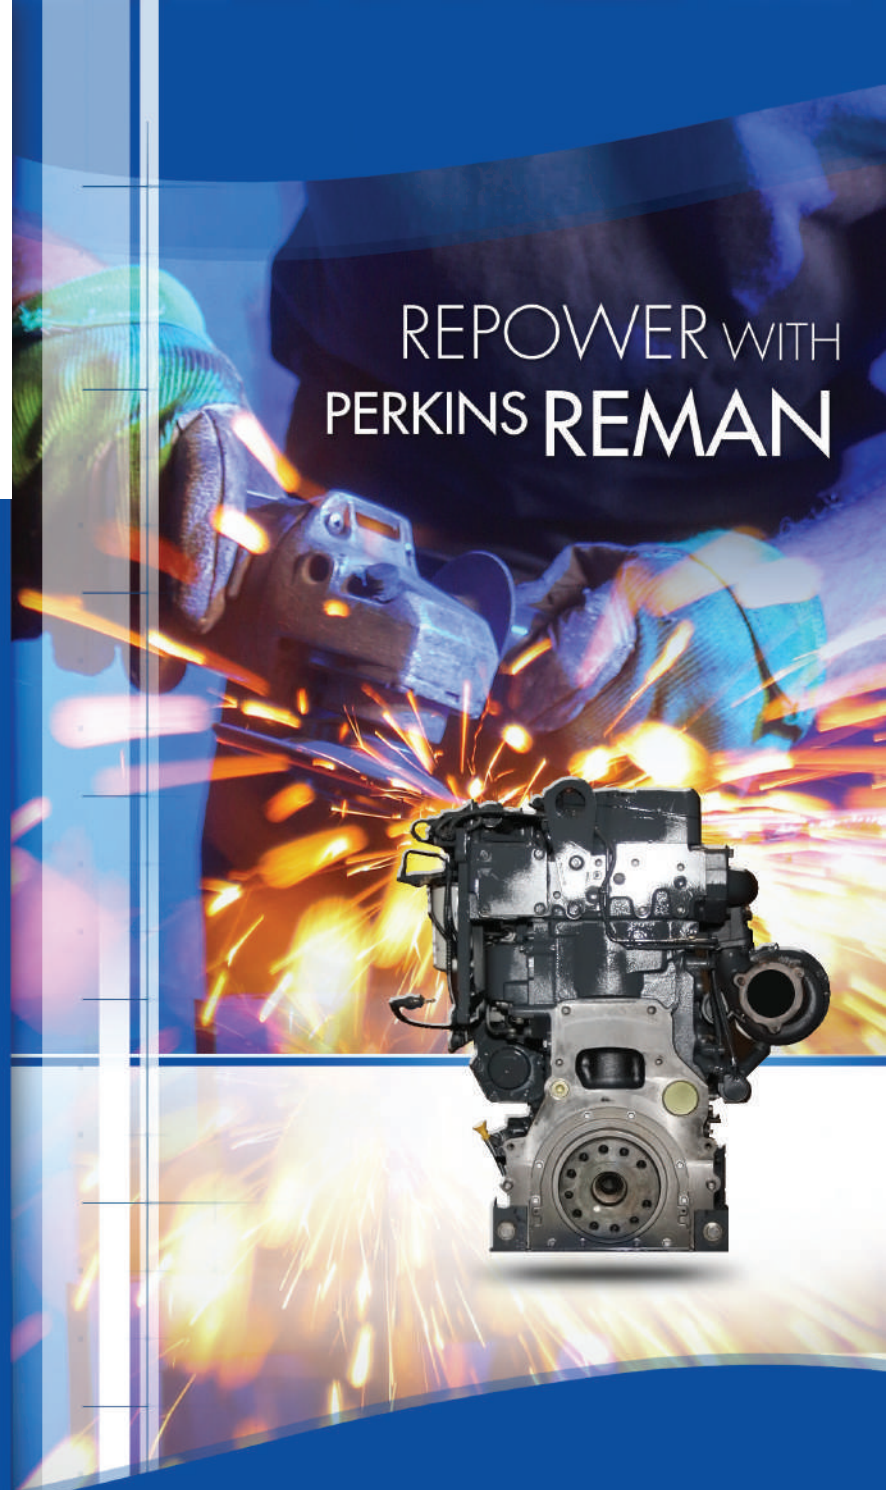

### Remanufactured...Not Just Rebuilt

Our reman engines are a cost effective option to power your equipment with like new performance and highly reliable operation.

We operate the largest diesel engine remanufacturing program in North America and our large Perkins engine core inventory is ready to be remanufactured for any application.

With the capacity to produce up to 10,000 reman engine packages per year, our team can support all your reman engine needs.

*Our stock reman engines are ready  
to ship immediately and non-stock is  
typically shipped within 72 hours*

REPOWER WITH  
PERKINS REMAN

# Each Reman Engine is Backed by a **1-YEAR PARTS & LABOR WARRANTY**

## Extend the Life of Your Equipment

### Our 6-Step Remanufacturing Process:

#### 1 Cleaning and Disassembly

Each part is cleaned and inspected, and castings are magnafluxed to check for cracks and defects.

#### 2 Parts Replacement and Machining

Any less-than-new parts are replaced with genuine Perkins parts and machined to meet customer specs.

#### 3 Dyno Testing

The engine is tested to verify all specs through varying loads.

#### 4 Delivery Prep

The finished engine is painted and mounted on a metal skid with additional parts such as water pump and turbo depending on the model, and EPA labels installed.

#### 5 Ready for Delivery

Each reman engine from Perkins is backed by a one-year parts and labor warranty.

#### 6 Core Return

Return your old engine core to our facility for a refund.
